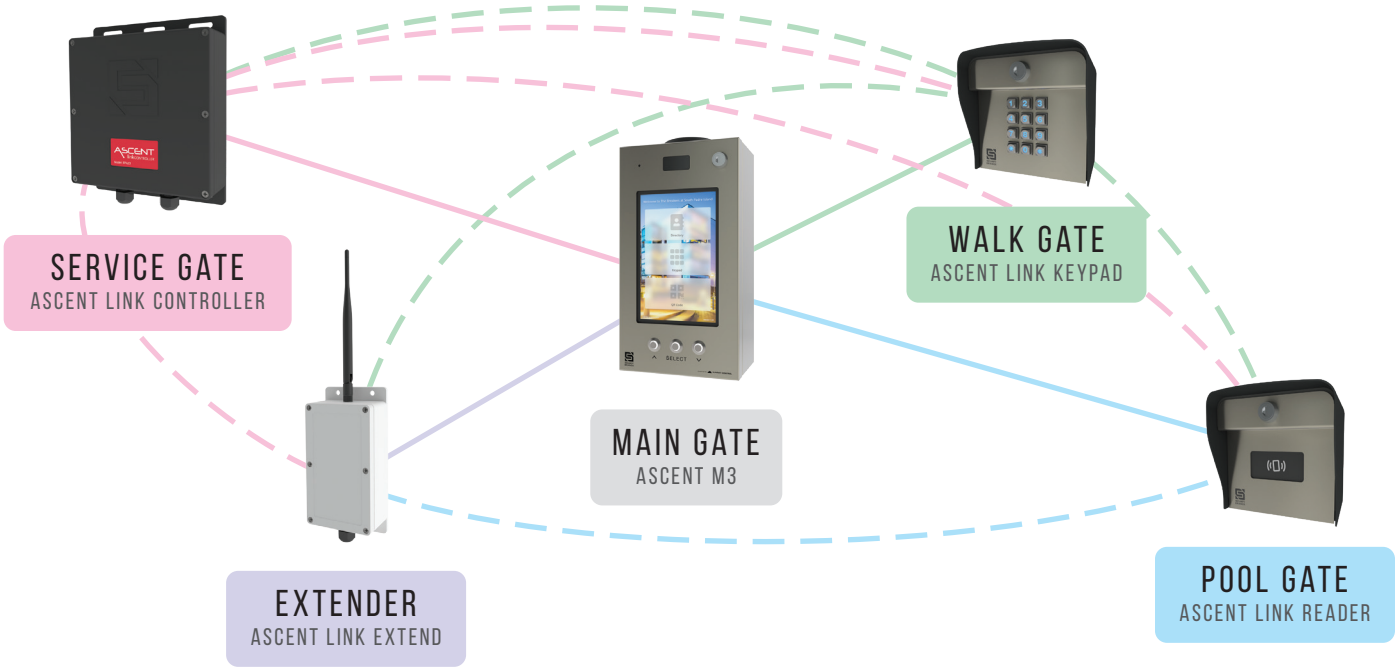
ASCENT link

37 SERIES EXPANDABLE WIRELESS MESH ACCESS CONTROL FOR ASCENT



powered by SUMMIT CONTROL

GET THE SUMMIT CONTROL APP

Download on the App Store | GET IT ON Google Play

EXTREME VERSATILITY

These units are completely wireless, meaning they go wherever you need them.

PLUG AND PLAY

Easily install and connect Ascent Link units and then manage via Summit Control.

MAXIMUM COMPATIBILITY

Connect gates, doors, and other access points to the network using industry standards like a 26-bit Wiegand interface.

IMPROVES AS IT GROWS

As you build your mesh network outward, each additional Ascent Link unit improves the quality and reliability of the network.
